The Norwegian bark, Alf, Captain Borge, which sailed from Denmark on October 27, for Philadelphia with a cargo of sugar, has been given up as lost. The cause of the fire was a defective boiler. The fire was caused by a defective boiler.

GENERAL DISMAY.

Successors of Boulanger in the Paris Election—The Ministry in a Crisis.

And General Uncertainty as to What Will Come Next—Boulanger's Safe Majority.

Only Minor Disturbances During the Election—Plenty of Troops on Hand to Quell Disorder.

PARIS, Jan. 28.—Complete returns of the election in the department of the Seine yesterday show the following result: Boulanger, 16,077; Jacoby, 16,077; Jacoby, 16,077; other candidates, 10,553; Boulanger's plurality, 81,553; Boulanger's majority, 54,432.

The most remarkable phase of the election was the perfect discipline of the Boulangists, who, in the example of Boulanger's wonderful skill as an organizer. Each of the 573 polling places in the department was guarded by members of the Patriotic League, who worked like beavers throughout the day, and the Boulangists' discipline of their work.

The excitement at eight o'clock last evening when the returns showed that Boulanger's majority in St. Denis was 8,000 was very great. In the Eight arrondissement Boulanger polled three times as many votes as his opponent, and this announcement added to the excitement. The members of the Government were astonished at the result.

During Saturday night there was much excitement and considerable disorder throughout the city. Many brawls and street fights occurred, which in some cases were very serious. The disorder was particularly great in the vicinity of Montmartre and the Faubourg St. Denis.

The Boulangists predicted the immediate fall of the Ministry, the dissolution of Parliament and a general election in March. They also forecast a rupture in the ranks and expressed the belief that W. L. White would be elected.

KANSAS LEGISLATURE.

A Condensed Report of the Week's Proceedings.

The Senate was not in session on the 28th. In the House the Senate "Beef Comb" resolution was passed. The House also passed a resolution to inquire into complaints of shippers as to discrimination at the Kansas City stock yards.

The Senate met at four o'clock p. m. on the 28th and Senator Kelley introduced three bills, one of which is aimed at trusts and monopolies and another gives additional powers to the board of Railway Commissioners.

DUN'S REPORT.

The Usual Weekly Review of the State of Trade in the Country.

New York, Jan. 28.—R. G. Dun & Co.'s weekly review of trade says: "The state of trade is unusually perplexing, for, with general complaint of the dullness, there are evidences that the volume of transactions is large. The payments through banks last week were 25 per cent. larger than for the corresponding week last year at New York and 16 per cent. larger at all other cities. Railroad earnings also show that traffic is large. The demand for money is sufficiently active at nearly all interior points, moreover, to indicate that a large business is in progress. Yet it is undeniable that the prevailing tenor is one of disappointment at the result of business since the new year began, and this is not wholly explained by the steadily declining prices of products. At Southern points, after some depression, trade appears to be improving. In the Northwest, and at the equal to that of last year, and at the same time, a clearly larger. The supply of money seems to be everywhere ample for legitimate demand. There are no indications of general unsoundness or over-straining of commercial credits. In the great iron industry, consumption for all other railroad purposes appears to be larger than ever; but there is serious disturbance. In consequence the Iron Age reports a 'general weakening' which there is no use in blinking at, and builds the furnace which can not face without loss a decline of fully \$1 from present prices which may suspend production. At Western points Southern iron is offered at prices equivalent to \$12 at Birmingham, which is considered equal to \$17 for Pennsylvania iron; and large sales are reported at prices below published quotations. A decline in the price of coke is considered probable, and the anthracite coal market continues weak.

The decline in wheat continues, the price having fallen 2 1/2 cents for the week. As the prices reached this week were 93 1/2 to 95 cents there has been some buying for export, though not as yet for Great Britain. Corn has fallen 1 cent and oats 1/2 cent. Pork prices have declined, mess about 50 cents per barrel; lard 20 and hogs 10 cents per 100 pounds. Cotton is a shade lower, with sales of \$21,000 bales, and coffee 3/4 cents higher, with sales of 25,000 bags. The market for copper is quiet, with a slight advance to 5 1/2 cents; lead is also weak at \$3.80, but spelter is quoted at 5 cents. There is little activity in groceries, but the sugar market favors holders. The general average of prices has fallen 8 1/2 per cent. for the week.

The supply of money here increases both by remittances from the interior and by excess of treasury disbursements over receipts, which reached \$1,700,000 for the week. The exports of merchandise from New York show a gain of 11 per cent. for three weeks. The stock market is nevertheless so firmly sustained that the average decline in prices has been only 60 cents per \$100 for the week.

BY THE RIVERS OF BABYLON.

The Expelled Boomer Patients Waiting For the Uncle Sam's Salute to Take Their Departure.

GALESVILLE, Tex., Jan. 28.—Reports state that the soldiers sent for Fort Hill for the purpose of clearing Oklahoma of boomers have about completed the work and that the expelled boomers are now en route along the southern boundary of the territory from which they have just been driven.

The number of boomers that were encamped in the Oklahoma country prior to the arrival of the soldiers on Wednesday was estimated at 1,000. The soldiers, however, are now en route along the southern boundary of the territory from which they have just been driven.

The expelled boomers are many of them in poor circumstances, but they are reported to be quite cheerful and contentedly their vexations and disappointments in the hope that the days are numbered till they will be allowed to enter again and enjoy in peace the coveted land.

Some of the expelled boomers now encamped at Galesville are threatening to re-enter Oklahoma as soon as the soldiers have left, but they will probably not have the opportunity soon to carry this threat into execution, for the soldiers are now en route along the southern boundary of the territory from which they have just been driven.

TEXAS ELECTORAL COLLEGE MEETS.

AUSTIN, Tex., Jan. 28.—The rejection of the President's Electoral College by Mr. Ingalls, President pro tem. of the Senate, created a commotion here. The opinion as voiced by State Elector Wood, is that the action of Senator Ingalls in refusing the returns was absolutely unnecessary and that the Senate should have accepted the returns.

Another Massacre.

ZANZIBAR, Jan. 28.—An English missionary named Brooks and sixteen of his followers were murdered on Saturday near Sandani by members of the coast tribes and natives of Zanzibar. These murders indicate the extent of the hatred to whites the Germans have aroused. Sandani for many years has been the starting point of European missions, the natives welcoming the missionaries and assisting them, especially the English.

Uncle Sam Firm.

WASHINGTON, Jan. 28.—Representative Morrow, of California, chairman of the Committee on the Pacific Coast and Foreign Affairs, intends to call the subcommittee together and get to work at the earliest opportunity. He says that his views on Samoan affairs are positive and have been made known to the Senate resolution introduced by him in the House last session. The statu quo at the time the representatives of the United States, Germany and England met, he said, would have to be restored, and this would necessitate the replacement of German Malaita in the position from which he was so unjustly removed by the German agents and sent to the Marshall Islands.

Compared With Robespierre.

PARIS, Jan. 28.—In the Chamber of Deputies yesterday, M. La Marselle, a Conservative, asked whether it was true that the mayor of Bré had been suspended for inviting to a luncheon a Monarchist, M. Lambert de St. Croix. Premier Floquet replied in the affirmative. He said that the mandate of M. Lambert de St. Croix was to join in faction manifestation, the ultimate object of which was the overthrow of the Republic. M. La Marselle retorted that M. Lambert's predecessors were Liberals and he created much laughter at the expense of Floquet's expression of his opinion. Floquet had already been gagged.

Insurance Superintendent.

—Well, did you succeed in persuading Mr. Samson to insure his life? Agent (sadly).—No; I talked to him for six hours, but before I got in all my arguments he died. —Philadelphia Record.

THE NEW NAVY.

Easy Enough to Build Ships But Hard to Obtain Navy Guns.

WASHINGTON, Jan. 28.—In its report upon the Naval Appropriation bill the House Committee on the Affairs of the Navy states the present condition and future prospects of the navy of this country, saying: "With regard to a new navy, Congress seems to have settled upon a policy of appropriating toward its construction about \$6,000,000 per annum. Your committee believe that this will build up a navy as fast as prudence dictates. Our Navy Department and our shipbuilding are utilizing as far as may be, by every means within their power, the knowledge acquired from the country experience of other nations but they must acquire experience of their own. Too great haste on the part of the Government would inevitably result in confusion and waste and the best of all combinations instead of competition among shipbuilders. Besides it would be an easy matter in this country to build ships more rapidly than we could supply them with armament of domestic manufacture. Even in England, with all their facilities, there is loud complaint that the Government and all their contractors are unable to supply guns as they are wanted. The manufacture of a modern high power gun is not only an expensive but a slow and tedious process."

The committee says that the appropriation of \$625,000 for extending the gun plant at the Washington navy yard, which has proved to be insufficient, will, taken in connection with other arms, be all that is necessary to enable the navy to keep in condition to build the hulls of the finest modern vessels, armored and unarmored, as well as for the complete equipment of a great plant for the assembly of heavy ordnance satisfactory progress is being made by the private contractors for supplying heavy gun and armor plate for guns and for rapid fire machinery guns.
